Experience

Web Designer (WordPress | Webflow) at Nalitech Consults

2019 - Present | Remote

- Collaborated with the design team and stakeholders to gather project requirements and translate them into responsive web designs using Wordpress or Webflow
- Customized and implemented themes, templates, and plugins to achieve desired functionalities and design specification
- Optimized websites for speed, performance, and SEO, ensuring optimal search engine visibility and user experience
- Set up and managed content in the Webflow CMS (Content Management System) projects

UI/UX Designer at NaliTech Consults

2017 | Remote

- Created wireframes and low-fidelity prototypes to visualize the layout and structure of user interfaces
- Conducted usability testing sessions with users to gather feedback and make data- driven design improvements
- Developed user personas and scenarios to inform design decisions that aligned with user goals
- Worked closely with the development teams to ensure UI designs were implemented pixel perfect

Product Manager at ERCAS Integrated Solutions Ltd.

2014 | Remote, UK

- Conducted user research to understand the needs, preferences, and pain points of target users
- Collaborated with cross-functional teams, including engineers, marketers, and product managers, to align on project goals and requirements
- Participated in design reviews and critique sessions to provide and receive feedback from peers
- Managed design projects, timelines, and deliverables to ensure they meet deadlines and objectives
- Used design thinking principles to solve complex problems and challenges in the product development process.
